

# Üzeyir Talha Kılıç

**Email:** kilicuzeyirtalha@gmail.com **Website:** uzeyirtalhakilic.dev

**LinkedIn:** linkedin.com/in/uzeyirtalhakilic/

**Github:** github.com/uzeyirtalhakilic/

**Nationality:** Turkish

## WORK EXPERIENCE

***Mehel R&D and Automation***

**City:** ORDU | **Country:** Türkiye

[ 27/06/2024 – 26/12/2024 ]

### Application Programmer

**Courier Tracking System**

Independently developed a system for restaurants to track couriers in real-time and collect feedback.

- Mobile: React Native
- Desktop: Flutter
- Database: MongoDB
- Real-time: WebSocket
- Mobile App • Desktop App

**Wholesaler Mobile Application**

Led a 4-person team as project manager to develop a platform enabling wholesalers to receive 24/7 orders, send notifications, and run campaigns.

- Mobile: React Native
- Desktop: Flutter
- Database: MongoDB

## EDUCATION AND TRAINING

[ 04/09/2021 – 29/06/2026 ]

### Computer Engineering

***Ege University*** https://ege.edu.tr

**City:** İzmir | **Country:** Türkiye | **Level in EQF:** EQF level 6 | **Thesis:** Multimodal-Based Report Generation for Chest Radiographs: Integration of Textual and Visual Features for Automated Turkish Report Generation

[ 17/02/2026 – 17/08/2026 ]

### Intern Application Engineer

***IBTECH (A QNB Bank Subsidiary)*** https://www.ibtech.com.tr

**City:** Izmir | **Country:** Türkiye | **Field(s) of study:** Engineering, manufacturing and construction

- Developed enterprise-level applications utilizing C#, Java for QNB Bank's accounting ecosystems
- Implementing user interface (UI) bindings and integrating backend services
- Supporting application engineering processes in alignment with ECM Accounting AE department workflows
- Conducting component design and technical troubleshooting operations within enterprise software architecture

## LANGUAGE SKILLS

**Mother tongue(s):** Turkish

**Other language(s):**

### English

**LISTENING** B2 **READING** B2 **WRITING** B2

**SPOKEN PRODUCTION** B2 **SPOKEN INTERACTION** B2

*Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user*

## SKILLS

Google Drive | MySQL | Git | Docker | Microsoft Office: Word, Excel, Powerpoint, Outlook, OneNote | WebSocket | Python | Flutter | MongoDB | Javascript | SQL | NoSQL | database management systems | SQL Server | Dart | React Native | Java | C# | Image Processing, Image Analysis, Image segmentation | communication | use online communication tools | work as a team | manage feedback | create solutions to problems | think analytically

## PROJECTS

[ 14/05/2025 – 16/05/2025 ] **Veterinary Clinic Management and Tracking System (Hackacthon)**

Full-stack web app designed to help veterinarians and pet owners manage clinic processes efficiently in a digital environment.

- Separate authentication/authorization for vets and pet owners
- Digital tracking of identity, vaccines, tests, prescriptions, and reports
- Appointment scheduling and inventory management
- File upload/download for documents
- Responsive and user-friendly interface
- Technologies: React, TypeScript, Tailwind CSS, Node.js, Express.js, MySQL

**Link:** https://github.com/uzeyirtalhakilic/Vet_Tracking

[ 01/06/2025 – 19/06/2025 ] **Restaurant Management System**

Full-featured web application designed to digitalize and streamline restaurant operations.

- Role-based access for admin, staff, and customers
- Menu, order, table, and staff shift management
- Inventory tracking and visual reporting
- Technologies: React.js, Vite, Tailwind CSS, Node.js (Express), MySQL, JWT, Context API

**Link:** https://github.com/uzeyirtalhakilic/Restaurant-Management

**Sentiment Analysis with Machine Learning**

Developed a sentiment analysis application using Python and machine learning techniques to classify text as positive, negative, or neutral.

- Implemented preprocessing, model training, and evaluation pipelines
- Achieved high accuracy and visualized results using Jupyter Notebook
- Technologies: Python, scikit-learn, pandas, Jupyter, ML, data preprocessing, evaluation

**Link:** https://github.com/uzeyirtalhakilic/tweeteval-multiclass-sentiment-analysis

[ 02/11/2025 – 15/06/2026 ] **Multimodal-Based Report Generation for Chest Radiographs: Integration of Textual and Visual Features for Automated Turkish Report Generation**

- Developed a multimodal deep learning system utilizing **U-Net, DenseNet-121, GPT-2,** and **MarianMT** to generate automated Turkish radiology reports from chest X-rays.
- Trained and evaluated the model using the **MIMIC-CXR** dataset, achieving a **Macro AUC of 0.7195, a BLEU-4 score of 0.1458, and a BERTurk similarity score of 0.9178.**

## RECOMMENDATIONS

**Name: Seymen Ersen Diraman** Consulting Application Architect / Team Leader

Team Leader during my internship at the IBTECH - ECM Accounting AE department.

**Email:** seymenersen.diraman@ibtech.com.tr

**Name: Emine Sezer** Assistant Professor

Academic advisor for my multimodal deep learning-based graduation thesis project at Ege University, Department of Computer Engineering.

**Email:** emine.sezer@ege.edu.tr
