ABOUT ME

My roles in the IEEE, and BEST communities taught me firsthand how to unite people from different disciplines around a common goal and run organizational processes end to end. Open to learning and stepping outside my comfort zone, I aim to take on responsibility in large-scale projects and add lasting value to the teams I'm part of.

WORK EXPERIENCE

INTERN APPLICATION ENGINEER – IBTECH (A QNB BANK SUBSIDIARY) – 17/02/2026 – 17/08/2026 – IZMIR, TÜRKIYE

- Developed enterprise desktop applications in C# (.NET, WPF/MVVM) and Java for QNB Bank's accounting ecosystem
- Implemented XAML data bindings through an in-house object mapping framework and integrated authorization and user-state checks with backend services
- Designed modular components aligned with ECM Accounting AE workflows and integrated them into the existing enterprise architecture
- Analyzed and resolved production-environment defects; participated in code review

INTERN MOBILE DEVELOPER – MEHEL R&D – 24/06/2024 – 11/09/2024

Courier Tracking System *(Solo project)*
React Native, Flutter, MongoDB, WebSocket — *[LinkedIn Post]*

- Independently built end-to-end *Mobile* and *Desktop* applications enabling restaurants to track couriers in real time and collect customer feedback
- Implemented live location streaming over WebSocket with MongoDB as the data layer

Wholesale Ordering App *(Team of 4 interns — Project Owner)*

- Owned end-to-end delivery of mobile and desktop applications enabling wholesalers to place orders 24/7, with campaign and notification management
- Defined the technical architecture, guided a 4-person intern team, and was accountable for project delivery

EDUCATION AND TRAINING

04/09/2021 – 29/06/2026 İzmir, Türkiye
COMPUTER ENGINEERING Ege University

Website https://ege.edu.tr | **Level in EQF** EQF level 6 |

Thesis Multimodal-Based Report Generation for Chest Radiographs: Integration of Textual and Visual Features for Automated Turkish Report Generation

PROJECTS

02/11/2025 – 15/06/2026
Multimodal Report Generation for Chest X-rays (Undergraduate Thesis)

DenseNet-121, U-Net, GPT-2, MarianMT, PyTorch - **GitHub**

- Designed and built an end-to-end multimodal system generating automated Turkish radiology reports from chest X-rays
- Integrated multi-label classification across 14 pathology classes, lung segmentation, GPT-2-based report generation, and Grad-CAM interpretability
- Achieved ~0.72 macro AUROC, 0.1458 BLEU-4, and ~0.92 BERTurk cosine similarity on MIMIC-CXR

BEST Izmir Website

React, Vite, Tailwind CSS, i18next

- Solely developed a multilingual (EN/TR) corporate website featuring dark/light modes for BEST (Board of European Students of Technology) Izmir, a student community where I actively serve.

- Implemented comprehensive modules for event announcements, board/team showcases, sponsor tracking, and contact management.
- bestizmir.org

Ring of the Middle Earth (Distributed Systems Term Project)

Go, Apache Kafka, Docker, Nginx, Schema Registry - **GitHub**

- Built a distributed turn-based strategy game with a 3-node replicated backend using Go and Apache Kafka
- Designed a fault-tolerant architecture with Kafka Streams move validation, Avro schema registry, and sticky-session Nginx load balancing

14/05/2025 – 16/05/2025

Veterinary Clinic Management and Tracking System (Hackathon)

React, TypeScript, Node.js/Express, MySQL - **GitHub**

- Built a role-based clinic management system with vaccination and prescription tracking, appointments, inventory, and document management within a 24-hour **hackathon**

Sentiment Analysis with Machine Learning

Python, scikit-learn, pandas, Jupyter - **GitHub**

- Built a sentiment analysis application classifying text as positive, negative, or neutral, covering the full pipeline from data preprocessing to model training and evaluation

01/06/2025 – 19/06/2025

Restaurant Management System

React, Node.js/Express, MySQL, JWT - **GitHub**

- Built a restaurant management system with JWT-based authentication and role-based access control, covering menu, order, table, staff, and inventory management

LANGUAGE SKILLS

Mother tongue(s): **TURKISH**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Languages & Frameworks

C# | WPF | MVVM | .NET | Javascript | Go | Dart | Java | Python | Typescript

Web & Mobile

Node.js | React | React Native | Flutter

ML & Data

Natural Language Processing | Computer Vision | Deep Learning | Pandas | Pytorch

Databases & Tools

SQL | Git | JIRA | Mysql | Docker | Azure | Apache Kafka | MongoDB

RECOMMENDATIONS

Seymen Ersen Diraman Consulting Application Architect / Team Leader

Team Leader during my internship at the IBTECH - ECM Accounting AE department.

Email seymenersen.diraman@ibtech.com.tr

Emine Sezer Assistant Professor

Academic advisor for my multimodal deep learning-based graduation thesis project at Ege University, Department of Computer Engineering.

Email emine.sezer@ege.edu.tr
