ABOUT ME

Computer engineering graduate from Ege University with enterprise full-stack experience at IBTECH (a QNB Bank subsidiary), working on a C# WPF, Java and Oracle stack. I have also built full-stack web and mobile projects and completed a deep learning thesis on multimodal radiology report generation. My roles in the IEEE, EKAMIT and BEST communities taught me how to bring people together and run organizational processes end to end. I am open to learning in any domain and aim to take responsibility in large-scale projects.

WORK EXPERIENCE

INTERN APPLICATION ENGINEER – IBTECH (A QNB BANK SUBSIDIARY) – 17/02/2026 – 17/08/2026 – IZMIR, TÜRKIYE

- Developed internal enterprise desktop applications for QNB Bank's accounting ecosystem using C# (WPF/MVVM), backed by Java middleware services and an Oracle database
- Worked within a service-oriented, layered architecture built on an in-house framework; the WPF front end communicated with Java middleware through services
- Implemented XAML data bindings through the in-house object mapping framework and integrated authorization and user-state checks with backend services
- Designed modular components aligned with ECM Accounting AE workflows and integrated them into the existing enterprise architecture
- Analyzed and resolved production-environment defects; participated in code review

INTERN MOBILE DEVELOPER – MEHEL R&D – 24/06/2024 – 11/09/2024

Courier Tracking System *(Solo project)*
React Native, Flutter, MongoDB, WebSocket — *[LinkedIn Post]*

- Independently built end-to-end *Mobile* and *Desktop* applications enabling restaurants to track couriers in real time and collect customer feedback
- Implemented live location streaming over WebSocket with MongoDB as the data layer

Wholesale Ordering App *(Team of 4 interns — Project Owner)*

- Owned end-to-end delivery of mobile and desktop applications enabling wholesalers to place orders 24/7, with campaign and notification management
- Defined the technical architecture, guided a 4-person intern team, and was accountable for project delivery

EDUCATION AND TRAINING

04/09/2021 – 29/06/2026 İzmir, Türkiye
COMPUTER ENGINEERING Ege University

Thesis Multimodal-Based Report Generation for Chest Radiographs: Integration of Textual and Visual Features for Automated Turkish Report Generation

PROJECTS

02/11/2025 – 15/06/2026
Multimodal Report Generation for Chest X-rays (Undergraduate Thesis)

DenseNet-121, U-Net, GPT-2, MarianMT, PyTorch - **GitHub**

- Designed and built an end-to-end multimodal system generating automated Turkish radiology reports from chest X-rays
- Integrated multi-label classification across 14 pathology classes, lung segmentation, GPT-2-based report generation, and Grad-CAM interpretability
- Achieved ~0.72 macro AUROC, 0.1458 BLEU-4, and ~0.92 BERTurk cosine similarity on MIMIC-CXR

BEST Izmir Website

React, Vite, Tailwind CSS, i18next

- Solely developed a multilingual (EN/TR) corporate website with dark/light modes for BEST (Board of European Students of Technology) Izmir, a student community where I actively serve, including modules for event announcements, board/team showcases, sponsor tracking, and contact management.
- bestizmir.org

Ring of the Middle Earth (Distributed Systems Term Project)

Go, Apache Kafka, Docker, Nginx, Schema Registry - **GitHub**

- Built a distributed turn-based strategy game with a 3-node replicated backend using Go and Apache Kafka
- Designed a fault-tolerant architecture with Kafka Streams move validation, Avro schema registry, and sticky-session Nginx load balancing

14/05/2025 – 16/05/2025

Veterinary Clinic Management and Tracking System (Hackathon)

React, TypeScript, Node.js/Express, MySQL - **GitHub**

- Built a role-based clinic management system with vaccination and prescription tracking, appointments, inventory, and document management within a 24-hour **hackathon**

01/06/2025 – 19/06/2025

Restaurant Management System

React, Node.js/Express, MySQL, JWT - **GitHub**

- Built a restaurant management system with JWT-based authentication and role-based access control, covering menu, order, table, staff, and inventory management

LANGUAGE SKILLS

Mother tongue(s): **TURKISH**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Languages & Frameworks

C# | WPF | MVVM | .NET | Javascript | Go | Dart | Java | Python | Typescript

Web & Mobile

Node.js | React | React Native | Flutter

ML & Data

Natural Language Processing | Computer Vision | Deep Learning | Pandas | Pytorch

Databases & Tools

SQL | Git | JIRA | Mysql | Docker | Azure | Apache Kafka | MongoDB | Oracle Relational Database

RECOMMENDATIONS

Seymen Ersen Diraman Consulting Application Architect / Team Leader

Team Leader during my internship at the IBTECH - ECM Accounting AE department. Contact details available upon request.

Emine Sezer Assistant Professor

Academic advisor for my graduation thesis. Contact details available upon request.
